## Information Systems

Operating system developed by Map Cargo, which allows you to view international cargo operations, their documents, supporting documents, and progress status.

Repremundo development that allows:

- A two-way communication channel with the customer.
- Real-time reporting.

It is powered by 4 information systems.

WMS Specialized for operations control in distribution centers.

Specialized system for the management of Free Trade Zones and Authorized Warehouses that contains an integration with the DIAN systems such as Siglo XXI / Muisca.

Platform in which all the information related to the dispatch, operational and administrative monitoring for each of the land cargo transport operations is consolidated.

**Repremundo App:** Viewing, information exchange, regulations, customs news, profile management.
